DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to a cutting device for cutting four edges, classified in class 83, subclass 408.
 - II. Claims 6-10, drawn to a cutting method of recording media, classified in class 83, subclass 13.
 - III. Claims 11-19, drawn to a printer, classified in class 101, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions III and I, II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the cutter in the combination could be used to cut a diagonal edge into the recording media. The subcombination has separate utility because there is no printing in the subcombination, therefore it can be used solely as a cutter.
3. If Inventions II and I are elected, then further restriction is required as follows: Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and

Art Unit: 3724

materially different process. (MPEP § 806.05(e)). In this case a materially different process is possible. The apparatus can be used in a process that does not require the recording media to be stopped. Cutting of workpieces while they are continuously moving is well known in the art..

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to applicants representative, Manabu Kanesaka, on June 9, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Isaac Hamilton whose telephone number is 703-305-4949. The examiner can normally be reached on Monday thru Friday between 8am and 5pm. If attempts to
